226,278

Total Events

39.2%

Click-Through Rate

211

Countries

3,839

Smart-Links

Analysis Period: 19 August 2021 – 25 August 2021 (7 days)

1. Executive Summary

This report analyses **226,278 real traffic events** on Alfido Tech's music smart-link platform over 7 days in August 2021, capturing pageviews, clicks, and previews across 3,839 unique smart-link pages spanning 3,562 tracks, 2,419 artists, and 211 countries.

The platform delivers **strong engagement**: a 39.2% click-through rate (CTR) and 20.1% preview rate far exceed typical music marketing benchmarks. A single track, **Jalebi Baby** by Teshar, accounts for 17.7% of all pageviews — both the platform's biggest success story and its chief concentration risk.

Metric	Value	Signal
Total Events	226,278	7-day period
Pageviews	142,015 (62.8%)	Primary engagement metric
Clicks	55,732	CTR: 39.2% — strong
Previews	28,531	Preview rate: 20.1%
Unique Smart-Links	3,839	Wide catalogue breadth
Countries Reached	211	Truly global reach
Missing ISRCs	7,121 events (3.1%)	Data quality issue

Key Takeaway: 39.2% CTR across 226K events and 211 countries places Alfido Tech well above music industry norms. The primary challenge is concentration risk: one track drives 17.7% of all pageviews.

2. Traffic & Event Analysis

2.1 Event Type Breakdown

Pageviews dominate at 62.8% of all events. Clicks (24.6%) and previews (12.6%) together confirm high visitor intent — nearly 4 in 10 visitors clicked through to a streaming platform.

Fig 1: Daily stacked event counts (left) | Fig 2: Event type distribution donut (right)

2.2 Daily Trend (19–25 August 2021)

Daily events fell from 35,361 on Thursday Aug 19 to 29,808 on Monday Aug 23 — a 16.7% weekly swing. This pattern is consistent with organic social-media traffic (not search-driven), peaking mid-week when social posting frequency is highest.

Date	Pageviews	Clicks	Previews	Total	Daily CTR
19 Aug (Thu)	22,366	9,207	3,788	35,361	41.2%
20 Aug (Fri)	21,382	8,508	4,222	34,112	39.8%

Date	Pageviews	Clicks	Previews	Total	Daily CTR
21 Aug (Sat)	21,349	8,071	4,663	34,083	37.8%
22 Aug (Sun)	20,430	7,854	4,349	32,633	38.4%
23 Aug (Mon)	18,646	7,315	3,847	29,808	39.2%
24 Aug (Tue)	18,693	7,301	3,840	29,834	39.1%
25 Aug (Wed)	19,149	7,476	3,822	30,447	39.0%

3. Top Landing Pages — Smart-Link Performance

The top 10 tracks account for **62,053 pageviews (43.7% of total traffic)**. CTR ranges from 31.9% to 44.9%, showing that page design, DSP button ordering, and artwork quality materially affect conversion.

Fig 3: Top 10 tracks by pageviews with CTR overlay (pink diamonds)

Track	Artist	Pageviews	Clicks	Previews	CTR	PTR
Jalebi Baby	Tesher	25,175	9,692	5,974	38.5%	23.7%
Beautiful	Anne-Marie	6,819	2,173	1,659	31.9%	24.3%
Beautiful Day	Tundra Beats	5,981	2,198	1,571	36.7%	26.3%
ily (i love you baby)	Surf Mesa, Emilee	4,826	1,589	1,118	32.9%	23.2%
So Pretty	Reyanna Maria	3,532	1,245	749	35.2%	21.2%
Candy Shop	50 Cent, Olivia	3,407	1,113	849	32.7%	24.9%
Calabria	DMNDS / Strange Fruits	3,354	1,500	658	44.7%	19.6%
Summer of Love	Shawn Mendes, Tainy	3,338	1,359	712	40.7%	21.3%
Late At Night	Roddy Ricch	3,039	1,364	633	44.9%	20.8%
Build a Bitch	Bella Poarch	2,440	827	612	33.9%	25.1%

Insight: Jalebi Baby generates 3.7x the pageviews of its nearest rival. Calabria and Late At Night show the highest CTRs (44.7–44.9%) with lower volumes — prime candidates for paid amplification.

4. Geographic Analysis

Saudi Arabia leads in absolute pageviews (28,873) with a 31.1% preview rate — a "listen-before-you-stream" audience. The US achieves the highest CTR (45.7%). India contributes the second-highest pageview volume with 42.5% CTR but only 15.0% preview rate, suggesting desktop or search-driven intent.

Fig 4: Top 8 countries — pageviews (blue, left axis), CTR & preview rate (right axis)

Fig 5: Top 10 cities by pageviews

Country	Pageviews	Clicks	Previews	CTR	Preview Rate	Share
Saudi Arabia	28,873	9,495	8,966	32.9%	31.1%	20.3%
India	27,286	11,609	4,097	42.5%	15.0%	19.2%
United States	20,839	9,533	2,186	45.7%	10.5%	14.7%
France	9,674	4,054	1,933	41.9%	20.0%	6.8%
Iraq	4,897	1,836	1,527	37.5%	31.2%	3.4%
United Kingdom	3,845	1,517	608	39.5%	15.8%	2.7%
Pakistan	3,212	1,653	779	51.5%	24.3%	2.3%
Germany	3,141	1,225	428	39.0%	13.6%	2.2%

5. Engagement Matrix — CTR vs Preview Rate

The scatter plot plots the top 30 tracks across two engagement dimensions: click-through rate (x-axis) and preview rate (y-axis). Bubble size reflects pageview volume. Tracks in the upper-right quadrant represent the platform's engagement sweet spot.

Fig 6: CTR vs Preview Rate bubble chart — top 30 tracks (bubble size = pageviews)

Beautiful Day (Tundra Beats) leads with 36.7% CTR and 26.3% preview rate among high-volume tracks. Tracks below 35% CTR with high preview rates (e.g., Beautiful, Anne-Marie) suggest potential improvements to DSP button layout or artwork to convert preview intent into clicks.

6. Five Optimisation Recommendations

01**Replicate Jalebi Baby's Smart-Link Template**

Jalebi Baby generates 25,175 PVs — 3.7x its nearest rival — at a 38.5% CTR. Audit its artwork dimensions, DSP button order, and metadata layout. Apply the same structure to every new release within 24 hours of upload.

Impact: +5–10% CTR on new release pages within 30 days

02**Add Anghami & Deezer for Middle Eastern Audiences**

Saudi Arabia (32.9% CTR) and Iraq (37.5% CTR) have 31%+ preview rates yet convert 8–13 pts below the US average. Adding regional DSP buttons above Spotify reduces friction for the dominant local platforms.

Impact: Close 5–8 pt CTR gap; ~2,000 extra click-throughs/week

03**Launch Releases on Thursdays**

Traffic peaks Thursday at 35,361 events and troughs Monday at 29,808 — a 16.7% weekly swing. Thursday morning releases align with the organic momentum window before the weekend social lull.

Impact: Protect 10–15% of organic weekly traffic

04**Run Paid Campaigns for Calabria & Late At Night**

Both tracks exceed 44% CTR — the highest conversion efficiency in the catalogue — yet each has under 3,500 pageviews. Small paid boosts on proven converters yield measurable, low-risk returns.

Impact: 2–3x pageview volume at verified CTR efficiency

05**Register All 7,121 ISRC-Missing Events**

3.1% of all events lack an ISRC, causing smart-links to fail DSP auto-matching and producing broken or incomplete platform lists. Register via SoundExchange or the originating distributor.

Impact: Directly recovers lost click-throughs on 3.1% of all traffic

7. Conclusion

Alfido Tech's music smart-link platform is performing **well above industry norms** for a 7-day snapshot. A 39.2% global CTR and 20.1% preview rate reflect a highly motivated audience that actively engages with content before streaming. With 211 countries reached and strong engagement in both South Asia and the Middle East, the platform demonstrates genuine global scale.

The two structural risks are **concentration** (Jalebi Baby drives 17.7% of pageviews) and **data quality** (7,121 ISRC gaps blocking DSP auto-matching). Addressing both — alongside the geo-optimisation and scheduling recommendations above — positions Alfido Tech to grow total click-throughs by an estimated **20–30% without additional paid spend**.

Area	Current	Target	Priority
Global CTR	39.2%	43–45%	High
Saudi Arabia CTR	32.9%	38–40%	High
ISRC Coverage	96.9%	100%	Critical
Thursday Traffic Share	15.7%	18%+	Medium
Calabria Pageviews	3,354	>7,000	Medium
Top-1 Track Concentration	17.7%	<10%	Long-term

Bottom line: Fix ISRCs, clone the Jalebi Baby template, add regional DSPs for the Middle East, and launch on Thursdays. These four actions can unlock an estimated 20–30% uplift in weekly click-throughs at zero incremental ad spend.
